## **DETAILED ACTION**

## Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7 and 16-18, drawn to filtering eliminating dc composition of an input signal, classified in class 714, subclass 738.
- II. Claims 8-15, drawn to a testing base and RF generating circuit, classified in class714, subclass 742.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as performing analog to digital conversion. See MPEP § 806.05(d).

A telephone call was made to Jiawei Huang on 17 February to request an oral election to the above restriction requirement, but did not result in an election being made.
